PREFACE

The tables in this report classify the population of Newfoundland at the 1945 Census by ethnic origin and sex, and include data to show the age distributions of the population reported for each of the numerically largest origins. This information is presented for Newfoundland as a whole, and for each of the 25 census districts. Previous reports in this series presented data from the 1945 Census of Newfoundland for all districts, towns and settlements relating to the subjects of sex, age, marital status, religion, and literacy. Remaining reports will present information on such subjects as birthplace, schooling and movement of population, for Newfoundland and the 25 census districts.

Table 28 herein gives the population of Newfoundland by detailed ethnic origins and sex, and shows the percentage of each origin to the total population. Table 29 shows the principal origins (i.e. the numerically largest) by sex for census districts. Tables 30 and 31 give the population by principal origins and age groups, the former for Newfoundland as a whole, and the latter for each census district.

The reports in this series represent final tabulated results from the Census of Population, Agriculture and Fisheries, taken by the Newfoundland Government in 1945. These tabulations have been carried out in the Dominion Bureau of Statistics at the request of Newfoundland. Further reports are being released to show classifications of the population by occupation, industry, income, etc., as well as data relating to households and families, and summary compilations of the Census of Agriculture and Fisheries.
